PROFILE

As a passionate programmer with hands-on experience in various programming languages and technologies, I am eager to join Institute of Engineering Technology to enhance my technical skills, collaborate with like-minded individuals, and contribute to innovative projects. I aim to deepen my knowledge in areas like web development, mobile app development, and algorithms while also sharing my expertise with the community.

PROGRAMMING LANGUAGES

C

Python

Java

PROJECTS

1. Chatbot Development

Collaborative Project

As part of a team project with my friends, I contributed to the development of a fully functional chatbot designed to enhance user engagement and automate responses for common queries. We built the chatbot using Python to create a system that could understand and respond to user inputs with high accuracy. My role involved implementing key chatbot features such as real-time interaction and message parsing. Additionally, I worked on integrating the chatbot into a website, enabling users to interact seamlessly through an automated system.

2. Mobile App Prototype (AppSheet)

Collaborative Project

As part of a team, I worked on creating a mobile app prototype using AppSheet, a no-code platform for building apps. The focus of the project was to create a functional prototype that demonstrated key features and an intuitive user interface without actual backend development. I contributed to designing the app's layout and structure, ensuring that it met user requirements and was easy to navigate. We showcased this prototype to peers for feedback and potential further development.

EDUCATION

Bhavans Varuna Vidyalaya

2011-2022

Currently Pursuing Computer
science in College of Engineering
Trivandrum

2023-2027
